CANADIAN IS GUILTY, KIDNAPPER

HOLLYWOOD.—Estimating they will save millions in picture production, a resolution was passed at a meeting of 250 screen players today served notice that they will receive no salary cuts. A resolution, drawn at a meeting of 250 screen players today served notice that they will receive no salary cuts. A resolution, drawn at a meeting of 250 screen players today served notice that they will receive no salary cuts.

OTTAWA.—A member of parliament has made history. In the House of Commons in April 4, when the Public Works estimates were being considered, Joseph Achille Verreille, Liberal member for Lethbridge, urged the government to proceed with respect to the tariff in his constituency. His plea was that conditions did not warrant the expenditure at this time. The unique part of it all is that tinders had already been called for.

TEGUICALPA, Honduras.—Fire destroyed 14 blocks in the commercial center of the city. The chief fruit crop of the northern Honduras coast, and caused estimated losses of more than \$100,000. Foreign settlements and the United Fruit Company were not affected as they are separated from the native section of the city, which has a population of about 1000. There were no casualties, and the whole town, with the exception of the central zone and the military barracks, was destroyed.

ST. PAUL, Minn.—Ray Robinson, a former railroad worker at Edmonton, charged with the kidnapping last July of Haskell Bohn, son of a millionaire St. Paul manufacturer, pleaded guilty. In district court last week, sentence was deferred, but under state law the crime carries a penalty of from five to 40 years. Bohn was blindfolded and held captive in a house near St. Paul for six days last summer before a \$12,000 ransom payment freed him. Robinson was arrested in Northern Manitoba last week by Royal Canadian Mounted Police.

THIEF'S BARGAIN SALE

A youth who broke into a grocer's shop at Mexico City last before dawn and found no money, hit upon a novel plan for getting some. He opened the shop about an hour before the usual time, and stood in the door telling passers-by that he was holding a sale. When the proprietor arrived he found that the youth had been sitting under a half a cent a pound, coffee at three cents a pound, butter one cent the pound and new-laid eggs at four cents the dozen.

SEEDING FAIRLY GENERAL IN THE CARBON DISTRICT

Although the past week has been somewhat cold with heavy frosts at night, many farmers throughout the Carbon district have been seeding wheat and considerable acreage is now reported to be completed. With the frosty morning little seed may be done until noon and most of the seeding has been accomplished in the afternoon.

There is considerable moisture in the ground this spring, due to the rains in the fall, and the snow storms after the frost had been under the ground. This moisture will be ideal for germination of seeded when warmer weather prevails.

Grass is beginning to show green on the hills and flats now and if we get the April showers green moisture will soon be available for stock.

While some districts report that in all probability there will be a decrease in the acreage sown to wheat, such is not the case in the Carbon district, and farmers here are optimistic for the future and are planning to seed as much land to wheat as they have done in former years. Some even report that a larger acreage will be cropped this spring, although course grain will no doubt form a part of the cropped land, as much of the work is being done by horses and men and will be necessary for the coming fall and winter.

Mixed Farming More General

With the general falling off of grain prices the past few years many farmers in this district have gone into mixed farming and now nearly every farmer is milking a few cows and raising hogs in order to supply the necessities of life. While the price of farm produce is low, and does not pay for the work entailed, this is fortunate for the farmer being and the cream cheese is the bright spot for many families.

Machinery is Selling

There is a marked increase this year in the demand for machinery, and while considerable quantities have been made of second hand equipment, some new machinery is being sold. This is an indication that things are better in the farming district than they were a year ago, and that the farmer will survive the depression. Reductions and bonuses offered by various machine companies is also a factor in the promotion of sales of new machinery.

This land was seeded at one operation at a cost of fuel of an 11c per acre, by just using the One Way Disc and the other makes work. I am fully convinced that the Main thing in favor of the McCormick-Bearing is that it cuts the seed in the bottom of the furrow, down to moisture, and by doing so gives an even stand. In using this method for sowing, I find that the cost is cut in two and practically assures that the land will not rot. I have my summerfallow done over in May, the one half of it I used the red weeder three times during the balance of the summer, and find that this land is drifting some this spring, while on the other half I let the growth of weeds go until the last week in July when I went over it again with the One Way Disc and killed everything for the season. I had no trouble in making the cut and the land has not blown any and the cost of working was less than the other way. It is true that I lost some time in letting the weeds grow so long, but I think them before the weeds got and left the land so that it won't blow.

News of Carbon District Many Long Years Ago

April 17, 1924

During the months of May, June, July and August the local merchants will take a holiday every Wednesday afternoon.

The Hesketh branch of the Women's Institute was organized on Saturday afternoon at Beveridge Lake school.

A. Walker recently returned from a visit to Scotland.

Mr. S. J. Garrett now has the Chevrolet agency and has a new touring car for a demonstrator.

A son was born to Mr. and Mrs. Len Hay on April 11.

Len Hay has purchased a new Chevrolet car.

The death occurred in Calgary on Saturday, April 13th, of Richard Arnold, aged 21, son of Mr. and Mrs. W. L. Olive.

Little Elaine Torrance has the Scarlet Fever.

Miccadoo Says --

Benjamin Franklin wrote: "Only two things in this life are certain—Death and Taxes."

What the taxpayers of Carbon need just now is that they don't come in that order.

Many book lovers with their friends would join a Return-a-Book-to-Motion Club.

When common water becomes ice, the greatest change that takes place is the price.

Blessed are the dumb. They don't frolic in hellish race while men are power ruin their country.

The latest and most popular simile endorsed by the civil service is: "As permanent as a temporary cut in salary."

Man criticizes a woman for her extravagance but she never wastes more dollars' worth of shrimps shells in order to get a twenty-cent rabbit.

Marriage is always successful, if they are in love it can't fail, and if they aren't in love it isn't marriage.

AND HOW!

In one town in western Canada the "shoe is on the other foot." A few months ago the editor of the weekly paper suspended business and moved out of town. Surely no business man in these hard times closed up a paying business, and if his paper was not a paying business it would appear that he did not have the support of advertising merchants and good paying subscribers—that the people of that community did not appreciate the value of the local paper to the community.

The community has now had a short experience in doing without a newspaper and printer's office and the result is merchants and business men are now advertising for an editor. Evidently a very few months have proven the need of a local printing office. It is doubtful if the proposition will appeal to most experienced newspaper men. A town which did not give sufficient support to its local printer when it had one, to keep it there, will provide no inducement to another to make a venture—Re-exchange.

She woke up in the early hours of the morning and noticed her sleeping husband, "Jack," she said in a hoarse whisper, "Jack, wake up. There's a mouse in the bedstead!"

Hubby's snoringly sat up, "Well, what about it?" he groaned.

"I can hear it squeaking," she said fearfully, "and before this time it will be dead and left the land so that it won't blow."

"HOPPER PLAGUE ANTICIPATED IN MANITOBA"

Plains are being made to combat a grasshopper plague of alarming proportions in Manitoba next summer. Hon. R. L. McCreary, minister of agriculture told the Manitoba Legislature recently. The most effective form of bait has been chosen and sources of supply stressed. Surveyors' views of infestation from egg deposits were completed last fall by the Dominion entomologist, and a road lines have been obtained as to where to concentrate on the control methods.

Saskatchewan and Alberta are liable to be troubled with grasshoppers, too, and farmers are urged to be on the lookout for any signs of them, and to take immediate steps to exterminate them, wherever possible.

YOUNG FOLKS SUFFER FROM CARBON-MINOXIDE GAS

A number of the young folks of Carbon had the experience of suffering the effects of carbon monoxide gas last Friday night. A party of seventeen went to Hesketh in a closed-in truck and found the exhaust valves through the canvas enclosure. On arriving at Hesketh many began to feel the effects, although no real serious cases were noted. It appears that sufficient air mixed with the gas to enable the victims to survive the trip, otherwise the truck ride to Hesketh may have ended in disaster.

NEWSPAPER ADVERTISING PAYS

Because the uneven distribution of population in Canada, the daily and country newspapers are the most logical medium for reaching the advertiser. They will do the job for an advertiser that no other medium can do. Newspapers are so flexible, you can control your copy and your expenditure in dollars at twenty-four hours notice and in the weeklies at one week's notice. You can not do this with any other medium. When once you're contracted for it—there you are. That is why the department stores and all progressive retailers see them so profitably. They may buy a little good will publicity in other media, but for real sales they stick to newspapers.

"Smith is an awful liar."

"Oh, I don't know. I think he's pretty good at it."

Doctor: "So your husband talks in his sleep, does he? Oh—well, soon remedy that."

Mrs. Jones: "I am, especially, because that couldn't do anything to take him—somebody more distinctly?"

Physic: "Jack has placed his heart in my keeping."

Doris: "Well, you had better be careful with it. He told me last week that I had broken it."

"When I took a horse," crumbled one discomfited center, "he always sent me back, and I took a dog, he stops and scratches himself."

PREMIER MAY GO TO WASHINGTON ON OFFICIAL VISIT

Washington.—Unofficial report that Premier R. B. Bennett might soon pay an official visit to Washington was heard as plans were formulated for economic conversations between Prime Minister Ramsay MacDonald and President Roosevelt.

It was said, but not immediately confirmed, that the United States president had expressed to Hon. William D. Herridge, the Canadian minister here, a hope that Mr. Bennett could soon visit Washington.

Whether or not the desire of Mr. Roosevelt was that Mr. Bennett might time such a visit to coincide with the conversations he hopes to hold here soon after the middle of April with Premier MacDonald, was not known.

Mr. Herridge conversed with Mr. Bennett in New York City last week. Following the meeting it was said matters of general interest had been discussed. Since then there have been suggestions here that reciprocal tariff arrangements would be advantageous.

A prompt acceptance was received by President Franklin Roosevelt of the United States, to his invitation to Prime Minister Ramsay MacDonald, of Great Britain, to visit him in August and stay at the White House while here.

London, Eng.—Speeding up of the world economic conference will be the objective of Prime Minister Ramsay MacDonald's western visit to Washington, he indicated in the House of Commons.

The Prime Minister's projected 6,000 mile round trip for only a few days' talk with President Roosevelt at Washington stirred up no enthusiasm in the British press.

Present plans call for his departure on April 15 on the steamship "Berenaria." Three treasury officials are expected to accompany Mr. Bennett and his daughter. They may be Sir Frederick Leth-Brown, Sir Frederick Phillips and S. D. Wiley. T. K. Bewley, another treasury department official.

Aid For Western Canada

Ontario Assists Provinces To Meet Financial Obligations

Ottawa, Ont.—To help the four western provinces to meet maturing provincial obligations in New York, the Dominion Government in 1931 and 1932 advanced them a total of \$1,422,568, according to a series of answers tabled in the House of Commons recently by the Minister of Finance.

These advances were as follows:

1931	1932
Manitoba	\$3,180,883
Saskatchewan ..	\$7,055,866
Alberta	\$1,422,568
British Columbia ..	\$3,371,604
British Columbia has repaid \$3,169,915 on the foregoing advances.	
Saskatchewan ..	\$100,592
Manitoba ..	\$47,567
Alberta ..	\$586,393

Saskatchewan benefited to the extent of \$4,655,739.73 from the federal treasury in advances in 1931 and 1932 to assist that province in meeting provincial government expenses.

Boat Space Arranged For Cattle Export

Canada Expects To Ship 45,000 Head To United Kingdom

Ottawa, Ont.—The fact that boat space has been arranged on the assumption Canada would ship to the United Kingdom 45,000 head of live cattle this year was given to the senate committee investigating the cattle situation by Hon. Robert Weir, Minister of Agriculture. Cattle prices in the United Kingdom may be expected to improve but not much before the end of May, Mr. Weir said.

Admiralty Court Planned

Ottawa, Ont.—First reading was given in the House of Commons to a bill sponsored by High Court Justice, Minister of Justice, the purpose of which is to establish in Canada an admiralty court within the jurisdiction of Canadian statutory authority.

Satisfied With Assessment

The Psa. Man.—When Mayor C. R. Neely and members of the council opened the annual sessions of the court of revision here, they found that no appeal had been made against the revision of the assessment roll.

W. N. L. 1939

History-Making Conference

Ramsay MacDonald Plans Early Visit To Washington

Washington.—President Roosevelt laid plans for a history-making conference here soon with Prime Minister Ramsay MacDonald, while his special envoy abroad, Norman H. Davis, moved to learn how far the Hitler regime in Germany will co-operate for world disarmament and economic recovery.

From London came the word that the Prime Minister looks favorably on the idea and is making preliminary arrangements for sailing about the middle of the month.

Meantime word came to the state department that Davis is going to Berlin from Paris, Friday, to talk with Adolf Hitler's foreign minister, Baron Konstantin von Neurath. Davis will discuss matters mutually to disarmament and a date for the economic conference.

Hitler's rise to dictatorial power at the head of a strong Fascist movement has led to fears in some quarters that the nation would seek to re-arm in defiance of the Versailles peace problem.

London, Eng.—J. Ramsay MacDonald, Prime Minister of Great Britain, plans a speedy Easterlike mission to Washington, it was learned. Mr. MacDonald will confer with President Franklin D. Roosevelt and his aides regarding troublesome European and world problems.

Remaining in Washington only a few days, Mr. MacDonald will return to London after the House of Commons reassembles April 23, prepared to preside at the World Economic Conference, to push his disarmament plan at Geneva, and to continue the European pacification scheme inaugurated with Premier Mussolini at Rome last month.

London, Eng.—Speeding up of the world economic conference will be the objective of Prime Minister Ramsay MacDonald's western visit to Washington, he indicated in the House of Commons.

The Prime Minister's projected 6,000 mile round trip for only a few days' talk with President Roosevelt at Washington stirred up no enthusiasm in the British press.

Present plans call for his departure on April 15 on the steamship "Berenaria." Three treasury officials are expected to accompany Mr. Bennett and his daughter. They may be Sir Frederick Leth-Brown, Sir Frederick Phillips and S. D. Wiley. T. K. Bewley, another treasury department official.

Investigate "Akron" Disaster

U.S. Naval Court Will Make Searching Inquiry

Washington.—A court of inquiry and searching inquiry into the destruction of the U.S.S. Akron will be opened at Lakehurst, N.J., by a naval court of inquiry headed by Rear Admiral W. W. Phelps.

The court was ordered by Admiral William V. Pratt, chief of naval operations, after he and other high officials had heard a personal account of the tragedy from the three survivors. Lieutenant-Commander Herbert V. Wilkey, Richard E. Deal and Moody E. Erwin, enlisted men.

From naval craft sinking, the sinking of square miles off the New Jersey and Delaware coasts came reports of "no luck."

But Pratt sent out new orders to keep up the search until "there can be no thread of hope." The order was to conduct submarine rescue ship "Palcom" to start dragging for wreckage. Pieces of the craft, he felt, might contain the vital clue to the cause of the crash, upon which the three survivors could shed little light.

Upon the court's findings will follow, probably, the course to be followed by congressional investigation for which plans have been started. The wave of sentiment for abolition of the navy by congressional action is in some quarters. A few congressmen spoke up against "bystatic" conclusion.

Surtax On Higher Incomes

B.C. Bill Imposes Additional Tax On Amounts Over \$5,000

Victoria, B.C.—A bill providing for a surtax on higher incomes imposes an additional tax of one per cent on incomes of \$5,000 and up to \$7,500. The tax is increased by one per cent every additional \$2,500 up to \$47,500, when a maximum level of 18 per cent is reached, to apply on all incomes in excess of that amount.

By the terms of a bill to amend the Income Tax Act, every corporation will be compelled to transfer the commissioner of taxation a return of all dividends and bonuses paid to its shareholders or members during the preceding calendar year. The return must be made on or before the last day of February.

Belongs To Denmark

The Hague, Holland.—Denmark's title to eastern Greenland was confirmed by a decision of the permanent court of international justice in her favor in a dispute with Norway over its ownership.

More Jobs In U.S.

Washington.—William Green, president of the American Federation of Labor, in a statement, estimated that 230,000 persons lost their jobs in March bringing the total unemployed well over 13,000,000.

Peace Club Plan

Premier Mussolini, Of Italy, Says Plan Must Remain Intact

Rome, Italy.—While the French Government was drafting what reportedly is a revised peace project to submit to Premier Mussolini, Italy, Il Duce has issued an advance notice that the fundamental provision of his "peace club" plan must remain intact.

Premier Mussolini's statement was issued through the grand council of Fascism, his highest advisory body, after a late night session.

It declared his recent suggestions, asking for collaboration by France, Germany, and Great Britain for peace, are the only bases on which "peace or equality" can be built.

At the same time, the conviction was expressed that "through the work of clarification already initiated" the plan will find in the leaders of the government "the same comprehension that already has been shown by the people."

The council said it felt sure that the formation of a new political atmosphere will make a fruitful international collaboration also possible in the field of economics.

RECIPROCAL TRADE WITH U.S. OTTAWA RUMOR

Ottawa, Ont.—Events of the past few days have strengthened the belief here that a reciprocal trade agreement between Canada and the United States is being considered.

No official confirmation of this plan is available, but it is not the custom of the government to make policy disclosure while such projects are pending.

Hon. Percy C. Black, on his return from Ottawa to Halifax, said with respect to the lumber industry, that the government had "other measures under consideration expected to be of great benefit to the industry in this province."

Observers here interpret this statement as an indication that the Nova Scotia minister referred to the possibility of restoration to Canada of a share of the United States lumber market for many years the growth outlet for the products of Canadian forests.

The fact Hon. W. D. Herridge, Canadian minister to Washington, spent the greater part of March in Ottawa in close consultation with officers at the Department of External Affairs, adds weight to the rumors.

In the House of Commons some days ago, speaking of requests that certain commodities, including lumber, be included among those to be assisted by the export rehabilitation fund proposed in the budget, Prime Minister R. B. Bennett observed there were other means of assisting these commodities.

The tariff commission announced recently that President Roosevelt has issued his first proclamation to the effect of the flexible tariff plan, calling for a decrease in duties on certain agricultural hand tools. The president ordered a decrease in the duty on hay forks and four-tined fertilizer forks from eight cents each to four cents each and 22½ per cent ad valorem, the maximum decrease possible under the flexible law.

AS IL DUCE MET BRITISH PREMIER

Here is pictured the historic meeting between Premier Ramsay MacDonald and Benito Mussolini, of Italy, when they met recently to confer on a plan to preserve the peace of Europe. The photo was taken at Il Duce greeted the British Premier on the latter's arrival at Rome from Geneva by plane. Following this meeting Premier Mussolini announced his Four-Power plan for a five-year disarmament holiday.

MAY RECEIVE APPOINTMENT

It is understood that Sir Frederick Skyes will shortly have completed his term of office as Governor of Bombay and that J. C. C. Davidson (above) Chancellor of the Duchy of Lancaster may succeed him.

Lift U.S. Gold Embargo

President Roosevelt To Permit Free Exchange Under License

Washington.—President Roosevelt ordered the return of all gold over \$100 held by individuals to the federal reserve system before May 1.

In the same executive order the president authorized the secretary of the treasury to issue licenses permitting the use of gold in necessary domestic and foreign trade transactions.

For violation of the order the president decreed a maximum fine of \$10,000 and imprisonment of 10 years, or both.

The order was issued to get such gold as is still in hoarding and to end the national embargo to permit legitimate transactions under federal license.

The president will continue the firm executive hold on the gold supply of the United States to prevent foreign raids or domestic hoarding, but otherwise the gold embargo will be lifted.

By the order the secretary of the treasury is authorized to permit its free exchange against a licensing system.

Flee From Germany

Prof. Einstein's Daughters Leave Germany For France

Cog-Sv-Mr, Belgium.—Prof. Albert Einstein's two daughters have fled from Germany, the scientist declared.

The younger daughter, who is married to a Russian, left Germany for France. Her sister, the wife of a German, left Berlin secretly and has arrived at the town of Scheveningen in southern Holland.

Mrs. Einstein learned that the elder daughter had fled when she telephoned her home in Berlin and was told by a weeping servant that the mistress had left secretly for the frontier.

Welcome Jap Training Ships

Victoria, B.C.—Twenty-one guns from the signal tower at Esquimalt barked a formal welcome to the Japanese training ships, "Iwate" and "Yakumo," when they arrived in Esquimalt harbor. Shortly after they dropped anchor more than 1,000 sailors were given shore leave and crowded the streets of the city.

Fight Grasshopper Plague

Manitoba Taking Measures To Combat Expected Outbreak

Winnipeg, Man.—Plans are being made to combat a grasshopper plague of alarming proportions in Manitoba next summer. Hon. D. G. McKenzie, Minister of Agriculture, told the Manitoba legislature when estimates for his department were under consideration.

The most effective forms of bait have been chosen and sources of supply arranged. Mr. McKenzie said. Surveys of areas of infestation from egg deposits were completed last fall by Dr. Norman Criddle, Entomologist, and a good idea was obtained of the areas where the outbreak of grasshoppers is likely to be most serious.

The amount of money needed to combat the menace could not be estimated this early. Mr. McKenzie explained. It might be between \$30,000 and \$40,000. Premier John Bracken indicated a bill may be brought in before the end of the present session.

A resolution saying that "the state and Chancellor Hitler are calling for the church, and the church has to bear the call," was adopted at the closing session of the 14th National convention of the German Christian movement composed of Protestant Nazis.

The resolution was taken to mean the dissolution of the present church bodies and the revision of the Protestant church constitution by means of adapting the church to the state.

The Monarchist Church Zeitung asked editorially whether the Roman Catholic Church also would be included in the proposed revision.

The convention opened to celebrate God's victory over the Satanic forces of the underworld, — meaning the Nationalist revolution.

The convention demanded, among other things, the removal of all known theologians as Otto Dibelius, Wilhelm Doehring and George Burghart.

The government has announced that a regulation forbidding persons to leave Germany without special police permission will not apply to foreign-born persons. The regulation was invoked after numerous reports of flights of Germans of Jews, with their possessions, from Germany.

Worship 'Planes'

Hillmen In Mount Everest District Experience Change Of Heart

Russian India.—Hillmen of this country kneel and worship the "planes" of the British expedition which flew over Mt. Everest and Mt. Kanchenjunga. When the first "planes" were sighted the hillmen believed the mountain deities would punish them for disturbing their realm, but having watched the "planes" in their remarkable ascents, they have experienced a change of heart and now worship them as they pass overhead.

The government has announced that a regulation forbidding persons to leave Germany without special police permission will not apply to foreign-born persons. The regulation was invoked after numerous reports of flights of Germans of Jews, with their possessions, from Germany.

The government has announced that a regulation forbidding persons to leave Germany without special police permission will not apply to foreign-born persons. The regulation was invoked after numerous reports of flights of Germans of Jews, with their possessions, from Germany.

BRITAIN PLACES EMBARGO ON RUSSIAN GOODS

London, Eng.—The House of Commons gave second reading to the government bill authorizing executive declaration of an embargo against Russian goods, after turning down a Labor motion for its rejection by a vote of 34 to 48.

Opposition Liberals refrained from voting on the matter.

The government tabled in the House of Commons a white paper in which Sir Edmund Wood, British ambassador to the Soviet, told his own story of the arrest in Moscow of six British electricians on charges of espionage, describing conditions in Russia as a "reign of terror."

The ambassador described in these words an interview with five other prisoners.

"While the prisoners seemed generally in good health the drawn expression of the Russian and Cuban gave me a definite impression of their having been 'put through it.' They were all obviously terrified of speaking and all seemed themselves to be a minimum of replies."

On March 16 Sir Robert Vansittart telegraphed Sir Edmund Wood the substance of his conversation he had with the Russian ambassador to Great Britain.

In that conversation, he said, he told the Russian ambassador there was a wide-spread feeling in the United Kingdom that the charges against the six engineers were grotesque, hysterical, "a stage performance, and a very bad one at that, intended simply to disguise, by serving up scapegoats, ill-success of certain industrial undertakings in Russia."

In a stormy debate in the House of Commons over the bill giving the government wide powers to act in breaking trade relations with Russia, Sir Stafford Cripps cited various authorities on international law to show interference by way of reprisal was only justified when the accused had exhausted all means of redress before all the courts of the country in which he was detained.

Do you want to wait until they are shot? That is a voice amid a storm of Conservative interruptions.

Sir Edmund described his attempts to secure specific information on the nature of the charges against the men and to ascertain if they would get a public trial.

He told of an interview with Alan Monkhouse, director of the company, in which he learned Monkhouse had been questioned continuously for 19 hours after his arrest. At 3 a.m. he said Monkhouse was allowed to go to bed, but was aroused again at 7:30 a.m. for questioning and questioned for another 17 hours. He added good meals were provided, but that the questioning proceeded while the prisoner and his examiners ate.

World Amalgamate

Reported Express Companies May Decide To Join Forces

Toronto, Ont.—Toronto Telegram says a committee composed of Canadian Pacific and Canadian National Express Companies' officials has been formed with the purpose of determining whether amalgamation between the two companies can take place.

The Telegram said the committee, which is composed of high officials of the general executive offices of both railroads, is already looking over the ground and it is rumored strongly progress has been made so far that the two companies are in agreement regarding the terms of amalgamation except on the point of retention of employees.

"An amalgamation of the express companies to prevent competition in the number of employees of both companies being laid off or forced to retire, it is believed the only stumbling block in the matter of what basis the men are to be laid off."

"One express company wants the mass of senior to prefer to stay in the case of a merger, but their employees would be retained in comparison with 40 per cent of the employees of the other express company."

Inquiry Is Ordered

Cattle Export Trade To Be Investigated By Committee

Ottawa, Ont.—Decision to launch an inquiry into the export cattle trade by a committee of the senate means the commencement of a new case for the problem of managing ailed at the present session of parliament. A committee of the House of Commons is already busy investigating the milk trade and the dairy branch of the livestock industry.

The inquiry followed a proposal advanced by Senator D. E. Hiley, of High River, a veteran cattleman himself.

Hon. Frank Oliver Deceased

Crowd Attend Funeral Of Edmonton's Best Known Citizen

Edmonton, Alberta.—All Edmonton mourned when the funeral of its best known citizen and the west's greatest champion—Hon. Frank Oliver, was held. Following a simple but impressive service in First Presbyterian Church at 2:30 p.m. a lengthy procession travelled to Edmonton cemetery where burial took place in the family plot.

Rev. A. R. Osborn pronounced the last earthly rites for the pioneer, statesman and publisher. There were four married children.

HITLER PLANS TO LINK CHURCH TO THE STATE

Berlin, Germany.—Disturbed by a National Socialist movement to reorganize the Lutheran church structure, "coordinating" it with the principles of Nazism, the supreme council of the Evangelical Church re-mained Church constitution in its promise not to touch the country's independent churches.

The promise, said members of the council, was made in the speech with which the chancellor opened the Reichstag on March 23.

A resolution saying that "the state and Chancellor Hitler are calling for the church, and the church has to bear the call," was adopted at the closing session of the 14th National convention of the German Christian movement composed of Protestant Nazis.

The resolution was taken to mean the dissolution of the present church bodies and the revision of the Protestant church constitution by means of adapting the church to the state.

The Monarchist Church Zeitung asked editorially whether the Roman Catholic Church also would be included in the proposed revision.

The convention opened to celebrate God's victory over the Satanic forces of the underworld, — meaning the Nationalist revolution.

The convention demanded, among other things, the removal of all known theologians as Otto Dibelius, Wilhelm Doehring and George Burghart.

The government has announced that a regulation forbidding persons to leave Germany without special police permission will not apply to foreign-born persons. The regulation was invoked after numerous reports of flights of Germans of Jews, with their possessions, from Germany.

World Amalgamate

Reported Express Companies May Decide To Join Forces

Toronto, Ont.—Toronto Telegram says a committee composed of Canadian Pacific and Canadian National Express Companies' officials has been formed with the purpose of determining whether amalgamation between the two companies can take place.

The Telegram said the committee, which is composed of high officials of the general executive offices of both railroads, is already looking over the ground and it is rumored strongly progress has been made so far that the two companies are in agreement regarding the terms of amalgamation except on the point of retention of employees.

"An amalgamation of the express companies to prevent competition in the number of employees of both companies being laid off or forced to retire, it is believed the only stumbling block in the matter of what basis the men are to be laid off."

"One express company wants the mass of senior to prefer to stay in the case of a merger, but their employees would be retained in comparison with 40 per cent of the employees of the other express company."

Inquiry Is Ordered

Cattle Export Trade To Be Investigated By Committee

Ottawa, Ont.—Decision to launch an inquiry into the export cattle trade by a committee of the senate means the commencement of a new case for the problem of managing ailed at the present session of parliament. A committee of the House of Commons is already busy investigating the milk trade and the dairy branch of the livestock industry.

The inquiry followed a proposal advanced by Senator D. E. Hiley, of High River, a veteran cattleman himself.

Hon. Frank Oliver Deceased

Crowd Attend Funeral Of Edmonton's Best Known Citizen

Edmonton, Alberta.—All Edmonton mourned when the funeral of its best known citizen and the west's greatest champion—Hon. Frank Oliver, was held. Following a simple but impressive service in First Presbyterian Church at 2:30 p.m. a lengthy procession travelled to Edmonton cemetery where burial took place in the family plot.

Rev. A. R. Osborn pronounced the last earthly rites for the pioneer, statesman and publisher. There were four married children.

Jasper National Park, Great Alberta Reserve, Is Outstanding Game Sanctuary

Jasper National Park in Alberta, Canada, is today one of the greatest wild sanctuaries in the world. Here, in an area of 4,500 square miles, many species of wild life live free from human molestation. At the time white men first entered this region, a little over a century ago, big game was plentiful. Bighorn sheep and Rocky Mountain goat fed on the hillside, deer and ranged the valleys, and the flats a few miles south of the present Jasper townsite were frequented by buffalo. The whole country was a rich hunting ground for both white men and Indians.

When Jasper National Park was set aside in 1897, by the Government of Canada to meet the recreational requirements of the people and to serve as a refuge for the native fauna, great trouble had been made in the wild life by hunters. As a result of the establishment of sanctuary conditions the preservation of the different species of wild life indigenous to that region has been assured, and now hunters may feel confident of having an unfailing supply of game in districts adjacent to the park.

One of the chief attractions to visitors at the present time is the variety of wild life which may be seen along the most highways and trails in the park. Bear, moose, deer, bighorn sheep and caribou may frequently be seen from a car, while caribou may generally be sighted in the high open passes of some of the nearby mountains.

In recent years there has been a remarkable increase in the wild life of the park. It is estimated that the number of bighorn sheep has doubled within the past few years in the Athabasca Valley. They are especially numerous at Pelly, near the Inter-lake, Brazeau River, Snake Indian Valley, Moose Horn Creek, and Southfork River. The number of goats are numerous and are spreading to new ranges in the park. The largest herds of these animals are found at Snake River, Smoky River, Colla Range, Maligne Lake, Whittier Mountain and Circuit Valley.

Elk, moose, deer and caribou are seen in large numbers throughout the park. The elk, which was nearly exterminated a few years ago, have increased to such an extent that now they are extending their range in many directions. Reports state that they have been seen as far west as McBride, British Columbia, on the Canadian National railways, which is one hundred miles west of the park. Moose are also increasing in number, especially in the northern part of the park, which is heavily timbered and well suited to the needs of this animal. Deer in the park are rapidly increasing in numbers. Caribou are spreading throughout the park and are growing from the Smoky River area into British Columbia, as far south as the Canadian National Railway line. The moose are found at Pelly Pass, Twin Tree Lake, Tonquah and Circuit Valley, Smoky River, Brazeau Valley, Upper Snaring River, Dominion Creek and Mitten Valley.

There has been a large increase in the number of bears, especially in the immediate vicinity of Jasper. There are many bear colonies in the park and the animals are increasing rapidly in numbers. The bears constitute one of the numerous attractions at Lac Beauvert, where visitors in the evening hours catch glimpses of them in their home waters.

Women Have Pet Aversions

But Dislike Of Job Usually Varies With Individual. These were conclusions of the members of the Women's Institute of Burton, England, which has just completed a survey on housekeeping. The president was positive about the aversion it was getting up in the morning. Other dislikes were cleaning windows, spring cleaning, shopping, weed, washing up, washing one's hair, darning, patching, cooking, cleaning tools and shoes and tidying grates. Three agreed that stinking rabbits were the worst. Two others said it was cleaning chickens. Another disliked keeping mess waiting, and an old maid declared that she detested every thing.

The value of livestock on farms in Canada is officially estimated at \$375,722,000 for 1932 and farm poultry at \$34,738,000.

W. N. U. 1938

Zoo Loses Ancient Tortoise

London papers report the death from influenza of the 200, the giant tortoise at the zoo. There is no doubt that her registered age, one hundred and fifty, is correct; there had been carved upon her underside the year of the Peace of Versailles, 1783. This three-hundred-weight reptile had been ill for some weeks. Evident pneumonia developed, and last week claimed her at her prime. The animal was a native of Galapagos Island, off the coast of Ecuador.

In spite of her death, Hope will continue to be an object of interest, since she is to be mounted for exhibition purposes in the galleries of the Natural History Museum at South Kensington.

By Ruth Rogers

Record Not Very Good

Ninety-seven per cent. of Anglo-Saxons Here Infected With

Anglo-Saxons have a decidedly bad teeth record, Dr. Harry Thompson, dental secretary for the Dental Hygiene Council told the Toronto Health League.

Preventive dentistry, the speaker said, is a health measure and began only 80 years ago when the first extraction dentist hung out his shingle in Baltimore. Prior to that time the apothecary and the blacksmith attended to those teeth which ached their owners into drastic removal measures. Extraction era was followed by the "conservation age"—when the policy was to save everything in the mouth. Bridges and crowns flourished, as dentistry suprema. These came the X-ray which led to the discovery that 90 per cent. of disease is caused by infection and that 70 per cent. of the infection begins in the mouth, not in the blood in the weak parts of the body.

Dr. Thompson mentioned among the diseases most frequently attributed to infected anatomy, rheumatism, tuberculosis and some heart diseases. Prevention of decay was most important, the speaker said, and advised the wisdom of instilling health habits in the first seven years of a child's life.

He had shown that 97 per cent. of the Anglo-Saxons have decayed teeth, 64 per cent. of the Central European, the Maori of New Zealand only 1 per cent. and the Eskimo only 3 per cent.—and decayed teeth in the children of these two latter races is unknown. Scientists have been forced to the conclusion, Dr. Thompson said, that good teeth are the product of foods eaten in their natural state, with all the essential minerals.

Eskimos Drink Alcohol

Civilization Braving Natives Of Victoria Island

"Civilization" is ravaging the Eskimos of Victoria Island. They have taken to drinking denatured alcohol, according to the report of Corporal Wall of the Royal Canadian Mounted Police.

In paying inter-tribal calls, this potent and methydrate are among the apocryphal pleasures which the natives fear if the practice continues it will seriously endanger the health of the natives.

Some redoubtable features are noted, however. The influence of the missionaries is strengthening, and the Eskimo pride in themselves only in their hymn-books, but in their ability to sing these hymns.

"They observe Sunday very closely and will not do a thing, spending most of the day singing hymns, even if the camp is out of meat."

Humane influences are now being borne in on the natives. Corporal Wall noted the average of the Eskimo families was three children, of whom there were as many girls as boys. The practice of letting the girl babies die in infancy is dying out, he says.

A young pig weighing two pounds at birth, will weigh 200 pounds at six months, if properly fed.

White Leghorn stock from British Columbia has been shipped as far distant as Cape Town, South Africa.

"The wise carry their knowledge as they do their watches, not for display, but for their own use."

BRITAIN LAUNCHES THE "STARFISH"

Lecturer (describing his latest expedition in lengthy detail)—"Coming out of the jungle I was confronted by a yawning chasm."

Bored Stude—"Was it yawning before he saw you?"

Millions Have Defective Hearing

Approximately 3,000,000 people in Great Britain with defective hearing in one or both ears. This statement appears in a survey of two years' research by the National Institute for the Deaf and the Department of Industrial Physiology of the London School of Hygiene, published in the British Medical Journal.

A thirteen-storey modern apartment house has been opened in Havana, Cuba.

A reformer is one who makes it his business to meddle with what isn't his business.

Art Treasures Moved

Chinese Art Museum in Peking Might Be Damaged

Twenty per cent. of the art treasures of the Palace Museum in Peking, once the property of Chinese and Manchurian emperors, have been taken for safe keeping to Kaifeng and Loyang, in Honan Province. Two cities which were built at one time imperial capitals of China. It is possible that museums may be opened in the Honan cities, where the public may observe the art objects of Old China.

The museum's treasures were moved because it was thought that if the Sino-Japanese conflict were extended to Peking, it might cause damage to the museum there. The task of moving all the treasures was too great, so that only one-fifth were transported. Even so, 3,000 packing cases and two trains of 21 cars each were used.

The Palace Museum in Peking has so many art objects that it cannot display more than 10 per cent. at one time. It has been suggested for some years that the treasures be divided, and other Chinese cities be given the privilege of having a share of museum wealth. But Peking residents have vigorously protested such suggestion. They have argued that the palace of the emperors who gathered the collections form an ideal setting for the exhibition.

But now that one-fifth of the art objects have been taken from Peking, it is doubtful if they will be retained. They are more likely to grace museums in other Chinese cities.

Refuge For Jews

Immigration Into Palestine Is An Economic Question

Sir Philip Cunliffe-Lister, secretary for colonies, states that immigration into Palestine must be governed by the economic absorptive capacity of that country, and that this principle cannot be departed from.

He had been asked in the British House of Commons whether, in view of the position of Jews in Germany, restrictions on immigration into Palestine would be relaxed for the benefit of refugees.

He pointed out, however, that administration of the immigration laws was with the high commission in Palestine and that the Palestine executive and the Jewish agency may make any representations they wish to the high commissioner.

See Billions Of Miles

Two Hundred-thick Lens Being Made In California

Machinery is being installed at Pasadena, California, to grind and polish a mirror which will enable scientists to peer billions of miles farther into space than man has seen before.

The machinery will be housed in a huge, heavily insulated room of the optical shop hearing completion in the California Institute of Technology. The mirror, 200 inches in diameter, will be a part of a giant telescope to be built by the institute.

The largest now in use is the 100-inch reflector of the Carnegie Institution's observatory on Mount Wilson.

Work of Canadian Plant Breeders In Improving Quality of Wheat An Epic of Scientific Achievement

Dentists In Olden Times

Artificial Teeth Were Familiar In

Times Of Caesars
Dentists played an important role in the ancient civilizations of Egypt, Assyria and Peru, according to Dr. Leroy M. Miner, dean of the Harvard Dental School.

Excavations among the Incas revealed that the teeth of the Incas were ornamented with thin gold discs. In Ecuador, teeth were almost entirely covered by an overlay of gold in ancient Mexico and India, they were commonly adorned with turquoise and other precious stones.

In an Egyptian document nearly 3,000 years old, archaeologists found remedies for toothache and for fighting loose teeth, and in the ruins of Nineveh was found a clay tablet, 2,500 years old, in which a court physician recorded his diagnosis of a royal toothache.

"By the time of the Caesars," declared Dean Miner, "artificial teeth were in vogue. The Roman poet Martial notes with a sarcastic eye the efforts of the beauties of the day to maintain their charms and remarks that 'the belle lays down her teeth at night just as she does her alien robes.'"

"In another place he unkindly remarks that 'she now has removable teeth and would have removable eyes if they were for sale.'"

Has Ancient Lineage

Greyhound Probably Oldest Of Dog Family In World

The greyhound can boast of a very ancient lineage, and is probably the oldest of dog family in the world. It figures on Egyptian frescoes of the early Pharaohs, and was used for coursing by Greeks. A fine Anatolian greyhound was found in the British Museum.

Two greyhounds proves that they were appreciated by the Romans. Greyhounds were favorites with most English kings, from Canute to Charles the First, and King John repeatedly took greyhounds instead of money for payment of the penalties he inflicted. Until modern times the greyhound was an aristocratic dog which only "gentlemen" were permitted to keep.

Trace of this regulation can be found in the fact that in England until 1853 a special tax of twenty-two shillings each was levied on greyhounds to place them beyond the reach of all except the favored few.

Notice Avoided Nothing

Uses Of English Year Did Not Save His Apple

A vicar who had a nice orchard attached to his vicarage was rather annoyed to be learned that his neighbors were coming to camp in the field close by. He put a card against one of the trees with the inscription: "Please do not touch the apples. We want them for the Harvest Festival."

The soldiers arrived, and the next day when he went to the orchard he found that all the fruit had been stripped from the trees. The card had been reversed, and the following announcement had what he had written: "All is safely gathered in, are the winter stores begin."

The Usual Procedure

A doctor who was superintendent of the Sunday School in a small village asked one of the boys his question: "Willie, will you tell me what we must do in order to get to heaven?"

Said Willie: "We must die." "Very true," replied the doctor, "but tell me what we must do before we die."

"We must get sick," said Willie, and scold for you."

Millions Have Defective Hearing

Approximately 3,000,000 people in Great Britain with defective hearing in one or both ears. This statement appears in a survey of two years' research by the National Institute for the Deaf and the Department of Industrial Physiology of the London School of Hygiene, published in the British Medical Journal.

A thirteen-storey modern apartment house has been opened in Havana, Cuba.

A reformer is one who makes it his business to meddle with what isn't his business.

"The contributions made by Canadian plant breeders in the form of superior varieties of field crops stand almost as an epic in the realm of scientific achievement," stated L. Newman, Dominion Cerealist for the Canadian Government, Experimental Farms, in a recent address broadcast over a chain of Canadian radio stations. "These contributions," he continued, "reveal a story of nearly half a century of determined effort, replete with discouragement and disappointment but ultimately rewarded with enormous gains."

"The most important plant-breeding contribution made thus far in Canada has been in connection with the development of varieties of wheat capable of thriving under conditions which characterize much of the great wheat-growing plains of Western Canada."

While the creation of an early-ripening wheat was not the object of a wheat of good quality has been a major objective of the Canadian plant breeder for many years, more recently he has been grappling with another problem of equal if not even greater importance. This consists in the production of a variety of wheat yielding a high quality of grain, the yielding ability and baking quality of such varieties as Marquis with the ability possessed by certain non-fermenting wheats to stand the attacks of that dread enemy of the wheat grower, the disease known as wheat stem rust.

Work which, which is centered largely at the Canadian Government Research Laboratory at Winnipeg, seems to be progressing rapidly toward the desired goal and it is confidently expected that within the next two or three years the momentous announcement will be made that a new variety of wheat has been developed and good yielding ability is available for propagation by farmers in the affected districts.

A Record High Tide

Damaged Old Fortifies That Invaded Wall's English Invasion

The rock-ribbed old fortifications that have been the scene of the English invasion have fallen before the onslaught of a storm that drove huge seas into Louisburg's sheltered harbor.

A record high tide breached a gravity barrier for the first time in 177 years and flooded a large part of the town. Fortifications, hoping the base of the famous French bastion in the fortress grounds. The approach to the town was cut off, and the fort was practically ruined, and it is expected that restoration work on the remainder of the fort will have to be hurried this year to allow it to be repaired.

The last recorded occurrence of the kind took place in 1796, two years before the French took Louisburg, and caused the French authorities much trouble. Battered had to be withdrawn because the water rose up to their waists.

Not Much Of A Success

Airplane Wedding Was Found Too Noisy For Comfort

Marriage in an airplane may be a novelty, but it is not romantic, according to Mr. and Mrs. James Cusumaker, who were wed high above Sydney, N.S.W. The bride and groom took off from the aerodrome prepared to have their wedding broadcast to the world. The plan to watch off the airplane resulted in a noisy ceremony, was found impracticable. Rev. H. Mills of the Dutch Reformed Congregation, had to shout to the bride and groom had to shout their "I wills," and the radio announcer almost shouted himself hoarse. The couple had to grasp the controls about their heads several times to avoid being thrown out of the swaying plane during the ceremony.

When the ceremony was over, Mr. Mills said he had had enough of airplane weddings, the motion picture operator couple had to grasp the controls about their heads several times to avoid being thrown out of the swaying plane during the ceremony.

When the ceremony was over, Mr. Mills said he had had enough of airplane weddings, the motion picture operator couple had to grasp the controls about their heads several times to avoid being thrown out of the swaying plane during the ceremony.

When the ceremony was over, Mr. Mills said he had had enough of airplane weddings, the motion picture operator couple had to grasp the controls about their heads several times to avoid being thrown out of the swaying plane during the ceremony.

When the ceremony was over, Mr. Mills said he had had enough of airplane weddings, the motion picture operator couple had to grasp the controls about their heads several times to avoid being thrown out of the swaying plane during the ceremony.

When the ceremony was over, Mr. Mills said he had had enough of airplane weddings, the motion picture operator couple had to grasp the controls about their heads several times to avoid being thrown out of the swaying plane during the ceremony.

When the ceremony was over, Mr. Mills said he had had enough of airplane weddings, the motion picture operator couple had to grasp the controls about their heads several times to avoid being thrown out of the swaying plane during the ceremony.
